Online Monochloramine, Total Ammonia, and Free Ammonia Analyzer

MCX - Instrument

The MCX (Monochloramine Analyzer) measures and reports the concentration of monochloramine and ammonia dosing in water samples over specified ranges. The monitor uses the modified phenate method to test for monochloramine and ammonia.

When a continuous process stream of water is flowing through the MCX, the instrument will take samples at preset intervals and display the readings. Reporting is made easy with a built-in display/control screen, along with standard 4-20mA and modbus communication outputs for instant data transfers.

Features:

- Accurately measures monochloramine (NH₂CL-CL₂) up to 10ppm and total ammonia (NH₃-N) up to 2ppm
- Manual and auto measurement modes with adjustable time between analyses
- Downloadable readings, and error logs, can be transferred to an external micro USB
- CAN/CSA and UL certified
- NEMA 4X enclosure
- Calculates free ammonia (NH₃-N) up to 2ppm
- Simple fluidics
- Replace reagents every 30 days for continuous operation
- Compatible with a sequencer for multi-stream applications

Online Turbidity

Turbidity analysis is an essential part of ensuring safety in water systems. Turbidimeters from HF scientific include features that simplify installation, maintenance, and data access. Select an EPA 180.1 compliant white light model or ISO 7027 infrared version to match your local regulations.

MTOL+™ Features:

- Built-in ultrasonic cleaning
- Bubble rejection system
- Flow through cuvette design
- Low volume sample cell
- No external control required
- Long lasting light source that is field replaceable
- Connect to your SCADA system for easy 24-7 monitoring (simultaneous 4-20 mA and Modbus outputs)
- Data logging and storage of 1 year’s measurement and calibration data
- Variable user-selectable logging interval from 1 to 60 minutes
- Isolated 4-20 mA output standard
- USB software updates and data downloads
- Easy mounting adapter to replace Hach® 1720 or TU5300

HF scientific turbidity meters have a proven track record, with a low cost of ownership and a service life.

The new M100+ laboratory turbidimeter comes with upgraded electronics and features that create a better overall user experience. It combines the best of the Micro100 and Micro1000 into one unit capable of taking measurements from 0-4000 NTU.

M100+™ Features:

- Color touch screen
- Data logging
- USB drive for downloading data and installing software updates
- Calibration alert
- Auto ranging from 0-4000 NTU
- Includes one ProCal calibration kit with purchase

Primary Turbidity Standards

ProCal primary turbidity standards are pre-diluted, factory certified*, and ready for use with Hach® process, laboratory and field instruments as well as the HF scientific turbidimeter product line and other manufacturer's instrumentation. The ProCal standard formulation utilizes a preservative that enhances stability, yet is safe and biodegrades rapidly. Contact our customer service department for more information.
